Mix and mingle

This cozy modern bohemian bedroom balances it all.

It has the classic bedroom layout. The Boconcept leather headboard is flanked by none other than two West Elm nightstands on top of two beautiful mid century lamps. The lamps create a geometric and sturdy balance. The West Elm night stands and the mid century lamps blend and authenticate each other at the same time.

The best kept secret is the West Elm bed frame. It is easy to match a West Elm bed frame to any headboard. The days of using metal bed frames have passed and the sleeker bed frames have replaced the box springs and bed skirts. This bed frame opens up the room, is cleaner, and modernizes the space.

Vignettes are always important elements in space design. They add interest and intrigue. This beautiful mid century dresser with its modern sculpture and round mirror create the perfect vignette for this bedroom.
