Lacquer, linen & love is what it took to make this homey, Modern, elegant “Great Room” designed by Jolie Korek.

The clients close family wanted a place to gather, do homework, cook and share their days tales. This beautifully appointed island was to double for a homework and food prep space. Korek listened carefully to the families needs and designed an island that was fully functional and full of character. The Cesar stone counter has a 100 year warranty against chipping and staining.

Since the kitchen is where most families gather and spend most of their time together it should be durable, functional, aesthetic and unique. Korek’s philosophy is that the kitchen should be a series of workspaces. Each space should be designed to function individually and be within the plan of the classic appliance triangle.

Korek mixed mid century furniture and lighting to this classically Modern kitchen.

Fabricio Fabri the decorative painter and Korek’s right hand man glazed the walls bringing a warmth and beauty to the room. Fabri refined the kitchen with his high end finish.

Both rooms together kitchen and family room serve to create a wonder environment as “The Great Room.”
